

DCP

ULTIMA

What is DCP Ultima ?

A unique blend of Calcium, Phosphorus, micronutrients, enzymes, electrolytes & vitamins to satisfy the nutrients requirements of grower & layer birds. The micronisation technique ensures perfect blending & higher bioavailability of critical nutrients leading to healthier birds & higher egg productivity

Why DCP Ultima ?

- Ensures higher availability of nutrients to birds
- Nutrients blended in perfect ratio for needs
- Phytase enzyme ensures phosphorus availability
- Is a Ready mix and easy to blend with bird feed
- Electrolytes helps birds stay hydrated and maintain pH balance

Major Benefits of DCP Ultima

DCP Ultima contains 10 different trace minerals, chelated Zinc, manganese, and Copper. This is used as mineral supplements, added to the regular feed of poultry birds. This helps fight deficiencies like:

- Thin Egg Shell
- Small Eggs (size of egg)
- Delayed Egg Laying
- Short Peak Egg Laying
- Anemia
- Poor Immune status
- Osteoporosis
- Retarded growth
- Poor Bone growth
- Molting of Feathers
- Delayed Maturity

DOSAGE (per tonne of feed)

Upto 5 th week	:	4 Kg
6 th to 10 th week	:	6 Kg
11 th to 16 th week	:	8 Kg
After 16 th week	:	10 Kg

Increased Feed Conversion Ratio (FCR)

Mineral supplements in DCP Ultima ensures complete nutrition to layer birds and enhances the feed conversion ratio

Improved Egg Size & Egg Quality

Balanced nutrition and formulation ensures larger size of Egg produce and Better Quality

CONTENTS (maximum values)

Total Calcium	:	24.00%
Total Phosphorus	:	12.00%
Total Chelated Zinc	:	00.14%
Total Manganese	:	00.14%
Choline Chloride	:	600 ppm
Total Chelated Iron	:	400 ppm
Total Chelated Copper	:	200 ppm
Total Magnesium	:	100 ppm
Electrolytes	:	100 ppm
Phytases	:	100 ppm
Folic Acid	:	100 ppm
Iodine	:	50 ppm

Balanced Feed Ready Mix
For Happy, Stress free Birds
